

UniPrint has partnered with Lexmark and HP to provide the capability to print directly to UniPrint-ready Lexmark and HP printers. If UniPrint-ready Lexmark or HP printers are used in a UniPrint Gateway environment, a print server is no longer required.

UniPrint-ready Lexmark printers work with the ImageQuick card. For more information and for a complete list of compatible Lexmark printers, visit <http://www.lexmark.com/AP/solutions/includes/imagequick.html>.

UniPrint-ready HP printers works with the PDF Direct card. The PDF Direct card enables printers to print native PDF, JPG, GIF and TIFF files reducing data transfer loads and therefore reducing transmission costs. The PDF Direct card is currently available for the following HP printer models:

- HP LaserJet 2300, 4200, 4300, 4550, 4600, 5200, 5500, 9000, P4014 & P4015 printer series
- HP LaserJet 4100, 4700, CM4730 & M3035 multi-function printer series
- HP Color LaserJet 3700, 4650, 5550, 9500 & CP3520 printer series
- HP Business InkJet 3000
- HP Officejet 6310 printers

Note: This list may not be up-to-date. For a list of newer models that support direct PDF printing contact your local HP or Lexmark reseller.
