

Job Title: **Software Quality Assurance (QA) Analyst**

Location: Toronto, Ontario

We are an established Software Company looking for a Quality Assurance (QA) Analyst with Windows desktop application and system software testing experience. Our team which is comprised of a group of highly technical, young and energetic individuals is looking for a new team member. If you are searching for a corporate culture that promotes innovation and who is constantly exploring ways to incorporate new technologies in software, let's meet!

Duties include:

- Discovering and documenting defects for desktop and mobile applications;
- Creating test plans, test cases and checklists;
- Being able to build your own test environments from scratch;
- White-box and black-box testing, negative testing, customer scenario testing, stress testing, performance testing, scalability testing, regression testing and platform testing;
- Working with developers to troubleshoot and resolve issues;
- Assisting helpdesk team with the reproduction and confirmation of defects reported by customers;
- Identifying and executing test plans and test cases to verify software components and interfaces to assure quality and suggest potential improvements or features;
- Create automated test scripts to assure quality and develop test tools to increase effectiveness;
- Provide test estimates and contribute to ensure products are delivered on schedule with high quality;

Requirements:

- 3+ years working experience in a desktop application testing environment;
- 1-2 years working in a network administration role;
- Experience with enterprise network infrastructure;
- Extensive experience with Microsoft Remote Desktop Services;
- Experience with Microsoft Active Directory(AD);
- Experience with the setup of network printing;
- Experience with VMware Workstation;
- Experience with Citrix XenApp an asset;
- Experience with Virtual Desktop Infrastructure (VMware Horizon View, Citrix XenDesktop and/or Microsoft Hyper-V) an asset;
- Experience with Hypervisor Technologies an asset;
- Experience with Microsoft Clustering an asset;
- Experience with macOS an asset;
- Manual testing experience a must;
- Automated testing experience an asset;
- Excellent written and verbal communication skills and must be fluent in English;
- MCSE/MCP certification an asset;
- Bachelor's degree in Computer Science or College Diploma in IT an asset;
