

# VPQ Connectors for Multifunction Printers

## Features/Benefits

- **Users can release print jobs securely and on demand to any printer on the corporate network.**
- **Organizations can deploy secure pull printing in a multi-vendor printer infrastructure.**
- **Seamless interoperability and product familiarity with a single intuitive interface on the MFP panel.**
- **Option to use smart card reader to authenticate secure pull printing.**
- **Increased ROI and print cost savings through reduction of printer hardware and wasteful printing.**

**This screen shot shows the user interface of VPQ Connector on a Xerox MFP console.**

The VPQ Connectors are specially designed applications that can be embedded in Xerox, Samsung, HP and Brother multifunction printers (MFPs) to enable secure pull printing to network printers via UniPrint infinity's™ Virtual Print Queue (VPQ).

The VPQ Connectors allow users to authenticate on the MFP touch screen to release print jobs securely and on demand. The print jobs can be released to any other printer anywhere within an organization's multi-vendor printer environment. In addition to driving business efficiency and document security, the function allows the organization to save wasteful printing, hardware and energy costs.

Using the single intuitive interface on an MFP panel, users can use the existing features on the MFP and enjoy all the functionality and benefits of the UniPrint Infinity software, including simplified printer management, easy and error-free printer mapping, print statistics auditing and archiving, and a fully redundant printing setup with load balancing capabilities.

Each VPQ Connector is printer manufacturer-specific. See overleaf for supported MFP platforms and models.

# Supported MFP Platforms and Models

The VPQ Connectors are printer manufacturer-specific and supports the following platforms:

- Brother Solution Interface (BSI)
- HP Open Extensibility Platform – Device Layer (OXPd)
- Samsung eXtensible Open Architecture (XOA)
- Xerox Extensible Interface Platform (EIP)

The following includes examples of multifunction printer models supported by Xerox and HP platforms.

Since supported printer models are constantly changing, we recommend contacting your printer manufacturer or reseller directly for the latest platform supported models.

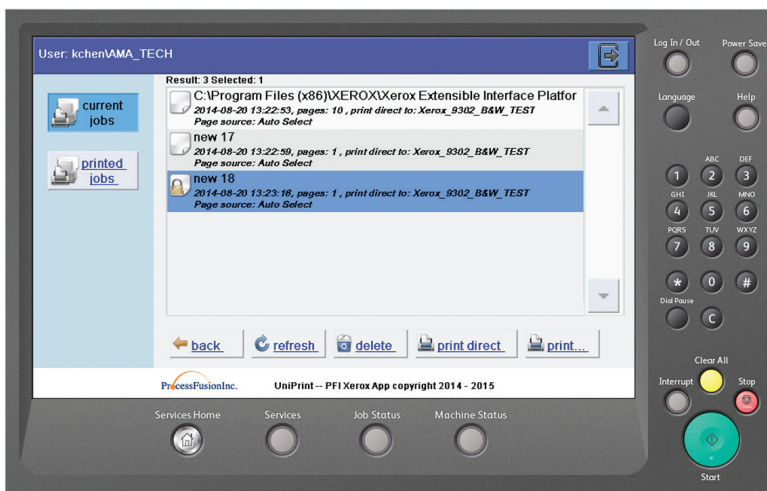

## Xerox EIP-capable MFPs (with EIP 2.5):

ColorQube™ 8700	WorkCentre™ 5865/5875/5890
ColorQube™ 9301/9302/9303	WorkCentre™ 7232/7242
WorkCentre™ 5325/5330/5335	WorkCentre™ 7525/7530/7535/7545/7556
WorkCentre™ 5665/5675/5687	WorkCentre™ 7830/7835/7845/7855
WorkCentre™ 5845/5855	ColorQube™ 9201/9202/9203
WorkCentre™ 7120/7125	WorkCentre™ 5225/5230

Phaser™ 3635MFP	WorkCentre™ 7328/7335/7345/7346
WorkCentre™ 5632/5638	WorkCentre™ 7655/7665/7675
WorkCentre™ 5735/5740/5745/5755	

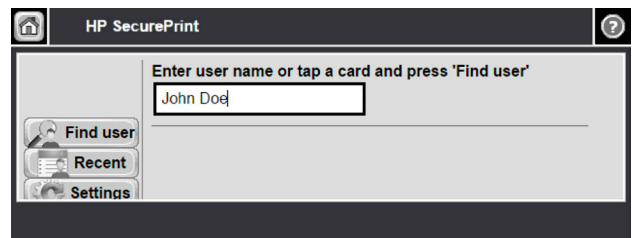

## HP OXPd Supported MFPs

HP LaserJet M3035MFP
M4345MFP
M5035MFP
M9040/9050MFP
HP Color LaserJet CM3530MFP
CM4540MFP
CM4730MFP
CM6030MFP
CM6040MFP
HP 9250C Digital Sender
HP Scanjet 7000n
