

## UniPrint Infinity Reducing the Cost of Printing

The price of a printer is a one-time cost, but the constant replenishment of ink, toner and paper is a cost you cannot avoid. It is estimated that the average employee uses 10,000 sheets of paper per year. A study conducted by Lexmark found that an average of 17% of printed pages were considered unnecessary .

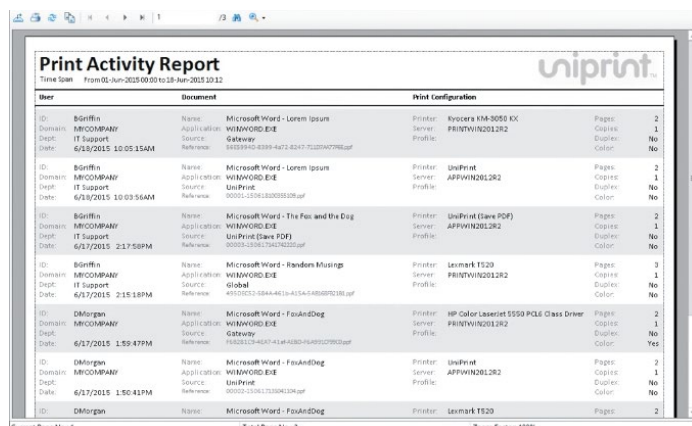

This means on average 1700 printed pages for a single user are considered waste each year.

Companies of all sizes and industries are feeling the pressure to streamline their operations in order to reduce costs and at the same time meet the demand of corporate social responsibility.

Included with UniPrint Infinity are a number of standard features that can be used to accomplish both environmental and cost-saving goals by focusing on reducing printing waste.

## Statistics and Archiving

The Statistics and Archiving feature allows print data and actual PDF copies of print jobs to be archived into a database.

## Benefits

- Create reports detailing printing trends across your network
- Cost data for budgeting departments or eliminating under-used printers
- User tracking and security monitoring
- Archive copies of print jobs in easy to use PDF-format for security or regulatory compliance
- Monitor the who, what, where, and when information of printed pages
- Optimize your print infrastructure and assess what resources are being wasted

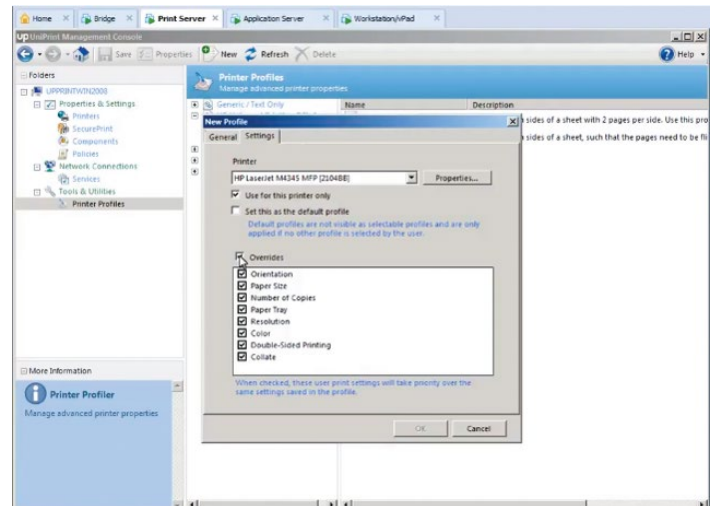

# Printer Profiles

Allows administrators to create “rule based” printing such as duplexing and monochrome printing for certain user groups or departments to save printing costs.

In addition, the creation of custom profiles allows for advanced, printer specific features such as stapling and hole punching to be utilized.

## Benefits

- Create default printer profiles with settings such as low DPI, black & white, and duplex to encourage eco-friendlier printing
- Research has shown that by printing duplex and black & white, organizations can save up to 40% of their printing costs

# Secure Pull Printing

- Intuitive device design for flexible deployment and simplified administration
- RFID, HID Compatible (Partner with HID Global)

Secure pull printing allows users to send their print jobs to UniPrint Infinity's Virtual Print Queue (VPQ) or one single print queue.

This eliminates the constant need for administrators to map different printers to different user profiles.

Print jobs are pulled from the VPQ and released by a vPad Pro print appliance, the UniPrint Vault App, or VPQ Connectors for Multi-Function Printers.

## Benefits

- Reduce printing waste and cost
- Improve workflow and efficiency
- Reduce the amount of print-related helpdesk calls
- Improve security by ensuring printers follow users

“ UniPrint provided us with an all-around printing solution and immediately lowered our cost of ownership. ”

– JC Coleman  
Network Admin at Carolina Container
